At first I thought this place was another one of those BS business after reading the reviews. But after hearing how they helped my grandmother finance her windows & bathtub. It changed my perspective. The lady over the phone was extremely patient with her & explained everything over the phone then sent workers out the next day. They were super fast with installments & the product quality was top notch. So over all she's happy I'm happy.

My windows were installed yesterday. The crew did a great job and were very friendly. The only bad thing was they showed up 30 minutes late but they made it up by doing such a great job.

I had Elite Home Energy replace the windows at a house in Irvine. The sells person came over explained what was what. Showed me an example and it was all really simple.

The installers came did a good job and cleaned up everything. I like the windows and had no problems with the whole project.

- All the complaints seem to be from people upset about being called about the service or products.. Not from real customers.

If you want good energy efficient windows at a good price then these guys can do it.

We where referred by a friends in Irvine that have such a wonderful home improvement from Elite Home Energy with window, doors, and a walk in tub.

They love the service so much that insisted that we contact Elite Home Energy and no one else.

We had a wonderful experience with this company at our Home in Antelope Valley, CA that we rent out. The sales person was on time and very informative about the different window, door options. The installers where clean looking and professional. The overall job was good and our home almost looks like new compared to the neighborhood. We later had them come back and do wall insulation and the funny foil stuff called Radiant barrier in the attic. Our renters say the house is much more comfey during the cool nights and cooler in the hot desert days.

Because of the great job they did - we let them keep a show sign to let the neighborhood know who did such a great job.

The other negative comments?

None them seem to be about the products or service, just a bunch of spoiled house wives and men without balls that can not say no to a cold caller, or sales person. Really sales people come to your home to sell you something - not say hi and drop off flowers.

I'm so excited your company finally has a yelp account. My husband and I have been previous customers as well as my Mother, and Aunt. We just recently got a walk in safety tub and my mother is in love, the low step with the theraputic feel is great. Out of all the products and services I have recieved through Elite, The Tub is at the top of my list. Seeing my mother happy is all that matters, great products as well as great customer service. Not to mention urgency on customer satisfaction.

I was surprised in regards to the 2 negative reviews below. I give Elite an A++ rating. Give there company a shot. Great Energy saving products, you can see the difference in your Home. They offer windows, coolwall, insulation, saftery tub, etc..

Yes they are eager, but eager to help you save and benefit from there products. Theres always going to be some negative reviews but a list of outstanding customer service, and pleased customers is definatly a longer list to look at.

Thank you Elite Home Energy for all the work you have done for myself and my family. You have offered exceptional service to us as well as many referrals I have given. I thought it was only right to leave you an honest review after seeing the two negative below. I will be in contact soon offering more great referrals, Thanks Elite!

This company contacted me throughout the year, and i kept saying no, but when i finally said yes i was glad that i did, because they were very helpful on making my decision on insulation. They helped me get my rebate and i am glad to recommend them to anyone.

I wanted to take a few moments to express our satisfaction with your company. Normally, I don't give my time to telephone solicitation, but this time I did with Jason who was both friendly and persuasive. From that call we consented to a scheduled presentation of the product Cool Wall. Having educated ourselves somewhat with other products, we were anxious to see if Cool Wall would better protect our home.

We were contacted by their representative prior to their arrival to ensure that the time was still convenient and their Sales Manager was prompt and courteous. Tomas came out to see if we would contract Elite Home Energy to do the job and we were sufficiently convinced that would be a good decision. He provided clear explanations and adequate samples to help us understand the product. Additionally, various incentives helped us go with Elite.

We found both Marcelo and Mato to be very thorough in the preparations before the Cool Wall application. The wood replacement, the preparatory filling and sanding served to rid the walls of unsightly past sins, as well as the masking and placement of plastic sheeting provided appropriate protection for those areas not to be painted. There was no feeling of rushing what had to be done. To say the least, Marcelo and Mato put in many full days' work including clean-up each day. Along with arriving promptly each day, they kept us apprised of the day's goals. Whenever issues came up that could not be anticipated, they were very accommodating resulting in building our confidence that the work was being competently handled.

Lazaro Mirabal proved to be a very thorough, efficient job overseer and didn't hesitate to get his hands dirty when his expertise was called upon. He kept us informed and we found him easily reached when we had questions or concerns. With his supervision we felt we got the best job possible. We are very pleased with the job and proud of the appearance of our home.

We want to thank Elite Home Energy for a job well done and would not hesitate to call upon them for our needs in the future.

Today I had Elite come and put insulation in my attic. I was pleasantly surprised at their professionalism and knowledge as to what they were doing. When they left, the house and the surrounding work area was cleaner than when they showed up (battling the Santa Ana's). All in all it was a satisfying experience and there was never any pressure put on me by any of the staff.
